January 31, 2026

Greetings from ICQCM -

First, thank you so much for agreeing to join us in New Orleans at the end of the month! This message is to communicate next steps and (re)introduce you to Javon Goard who will be your point person for logistics, and who may follow up in a separate email.

Summit 2026: The summit will take place at the Sheraton New Orleans Hotel, 500 Canal Street, New Orleans, LA 70130, February 26 - March 1, 2026. Please plan to arrive by 3:00 pm Feb. 26 for the summit opening at 4:00 pm. The summit will feature data training seminars, panels, grant development workshops, and scholar presentations.

Seminar Structure: Seminars are offered in three blocks of three concurrent seminars. Therefore, each ICQCM Scholar will sign up for three seminars. There are 60 scholars registered to attend the summit, so you should expect roughly 20 participants in your seminar. Javon will manage seminar registration to cap enrollment for each seminar. Seminars last 2 hours and fifteen minutes, with a 10-15 minute break built into the seminar session. Tech equipment will be available in each seminar room, but we ask that seminar leaders bring their own laptops. Scholars will have their own laptops as well. The seminar schedule is:

February 27: 10:15 am - 12:30 pm
Synthetic Control Modeling & Counterfactual Frameworks - Dr. Yung Chun, WUSTL
Large Language Models - Dr. Thema Monroe White, George Mason University
Intersectionality Modeling - Drs. Yasmyin Irizarry, Nancy Lopez, UT Austin, Univ. of New Mexico
February 27: 2:45 - 5:00 pm
Introduction to Critical Quantitative Research - Dr. Momin Malik, Mayo Clinic
Structural Equation Modeling - Dr. Zachary Collier, UConn
MAIHDA for Intersectionality Analysis - Dr. Ben Van Dusen, Iowa State
February 28: 9:00 am - 11:15 am
Critical Mixed Methods Analysis - Dr. Jessica DeCuir-Gunby, USC
Introduction to Data Analysis with R - Dr. Loni Tabb, Drexel
Machine Learning and Propensity Score Estimation - Dr. Jason Jabbari, WUSTL

These titles are placeholders. **Please send your preferred title and session abstract (<100 words) to Javon** (jgoard@jhu.edu). Please check the final program to find room assignments and to confirm your presentation time. Javon will make sure you receive the final program before February 15.

Seminar Content: The Summit aims to provide Scholars data-intensive experiences. Therefore, seminar presenters were asked to, 1) prepare materials that include data analysis procedures, 2) provide the data and instructional materials (e.g. codebook, syntax, tasks, readings, etc.) to participants, and 3) host a pre-summit virtual meeting (if needed) to prep Scholars for their on-site training experience, ideally between February 16 - 23.

Pre-Summit Scholar Preparation: A pre-summit virtual session with Scholars is optional. Some may wish to provide detailed pre-site instructions to download data, relevant software, or establish accounts instead of hosting a virtual pre-summit meeting. Other seminars may move more smoothly if all preparation for the training is done on site. While we are grateful you agreed to provide these data driven experiences, we understand the data-reliance of these seminars will vary across seminars. **Please let Javon know at your earliest convenience** whether you would 1) prefer that he schedule a pre-summit prep session for scholars, 2) rather have him email information to scholars about how they should prepare, or 3) rather provide all instruction on site.

How to Prepare: Here are a few points to keep in mind as you prepare your seminar materials:

- Each seminar should assume very little familiarity with the methodology.
- For mixed methods seminars, ICQCM seeks to support the integration of quantitative and computational methodologies into multi-method work. Therefore, while it is reasonable to think ICQCM scholars are strong quantitative researchers and need assistance with the qualitative research components, many will need assistance with integrating or developing the quantitative or computational component into or alongside qualitative data.
- While a data-driven experience is a primary goal, please keep in mind and be open to critical critiques of the approach. It may be helpful to include at the start of your presentation a slide that elaborates on how this particular methodology advances critical quantitative inquiry.

Data Availability: ICQCM Scholars will also have access to the following databases to use in seminars if instructors do not wish to provide their own data. If you decide to use these data in your seminar, it is understandable to ask all seminar participants to use the same data and measures.

- JHU Structural Inequality, Discrimination, and Racism Data Repository (https://jhusidr.github.io/data), Erik Westlund (ewestlund@jhu.edu) is the ICQCM contact
- IPUMS (https://usa.ipums.org/usa/sda/) – apply for access at no cost (https://usa.ipums.org/usa-action/menu)
- NCES national longitudinal data (https://nces.ed.gov/datalab/onlinecodebook) publicly available, no application required

Seminar Leader Checklist by Feb. 9

- If you have not, please contact Javon (jgoard@jhu.edu) for flight, hotel reservation, and honorarium paperwork
- Confirm choice and mode of pre-summit scholar preparation
- Send title of seminar and short session abstract <100 words
- Send a photo and abbreviated biography of 300 words or less
- Set up a time to chat with Odis for ideas and questions
- Submit three articles or references related to your seminar topic

Thanks again for agreeing to share your talents with us!

Odis, Momin, and Ebony
